Professional Summary

Backend developer with production experience shipping features across 5 repositories at an AI-powered SaaS startup. Built end-to-end systems spanning FastAPI REST APIs, RabbitMQ message queues, WhatsApp Cloud API integrations, and responsive Jinja2 email pipelines — 35+ merged PRs across backend, CRM, background workers, and CMS services. Equally comfortable in Java with Spring Boot, Spring Security, and Hibernate/JPA, with hands-on projects covering JWT authentication and role-based access control.

Work Experience

Backend Developer Intern

Feb 2026 – May 2026

Snapshare (AI-powered Event Photography SaaS), Remote

- Built end-to-end WhatsApp notification pipeline across multiple repos using RabbitMQ and Meta WhatsApp Cloud API — created approved message templates with dynamic variables, implemented E.164 phone normalization, and wired into CRM send flow for parallel email and WhatsApp triggers.
- Replaced hardcoded logos and brand names across 20+ email templates with a database-driven dynamic branding system — built reusable SQLAlchemy helper functions, added three-layer fallback (DB → Python → Jinja2), and rolled out across quote, invoice, questionnaire, and crew-notification emails.
- Built complete CRUD CMS backend for case studies using FastAPI, SQLAlchemy, and PostgreSQL — stored case-specific fields (client info, challenge, solution, results) as JSONB; designed 9 REST endpoints with Pydantic v2 schemas and separate request/response models.
- Migrated 15+ email templates from raw JSON to responsive HTML with Jinja2; fixed Outlook/Gmail cross-client rendering bugs, mobile width issues, and dark-mode artifacts.
- Created branded visitor-OTP template and wired it into 7+ endpoints (LinkedIn, registration, event, payment); retained existing user OTP logic.
- Coordinated delivery across 5 repositories using cherry-pick and rebase workflows in an Agile team environment; resolved concurrent merge conflicts and maintained clean PR history across 35+ merged pull requests.

Java Full Stack Developer Trainee

Jul 2025 – Jan 2026

Soften Technologies, Kochi

- Completed 6-month industry training; built Spring Boot applications with Hibernate/JPA, MySQL, REST APIs, JWT authentication, and layered architecture following Agile/Scrum practices.

Technical Skills

- **Python Stack:** FastAPI, SQLAlchemy ORM, Pydantic v2, Jinja2, Uvicorn, Slowapi
- **Java Stack:** Spring Boot, Spring Security, Hibernate/JPA, Spring MVC, JDBC, Thymeleaf
- **Databases:** PostgreSQL, MySQL, JSONB, Query Optimization, Database Design
- **Messaging & APIs:** RabbitMQ, Pika, WhatsApp Cloud API (Meta), REST API Design, JWT/OAuth2
- **Cloud & DevOps:** AWS S3/CloudFront, Docker, Docker Compose, Git, GitHub, Postman, Swagger/OpenAPI
- **Languages:** Python, Java, SQL, C
- **Practices:** Agile/Scrum, Microservices architecture, Git feature-branch workflow, PR reviews, Clean Code

Personal Projects

Multi-User Task Management System

Spring Boot, Spring Security, JWT, Swagger, MySQL

- Secure REST API with JWT authentication, role-based access control, task filtering/sorting, and full Swagger UI documentation.

E-Commerce Product Catalog API

Spring Boot, Docker, Jakarta Validation

- RESTful CRUD API with validation, thread-safe storage, HTTP semantics; Docker, hosted on Render.

Source: [View on GitHub](#)

Personal Expense Tracker

Spring Boot, JWT, Spring Data JPA, MySQL

- Multi-user backend for expense tracking with JWT auth, CRUD for expenses/categories, and analytics endpoints.

Source: [View on GitHub](#)

Company Job Application Portal

Spring Boot MVC, Thymeleaf, MySQL, BCrypt

- Full-stack web portal for job posting, applications, and admin management with BCrypt password hashing and resume upload.

Education

B.Tech – Computer Science and Engineering

KMCT College of Engineering, Kozhikode

2021 – 2025

CGPA: 7.0 / 10

Higher Secondary Education (Kerala State Board)

Score: 97.5%

2019 – 2021

Certifications

- Java Full Stack Development (6 months) – Core Java, OOP, Spring Boot, Hibernate/JPA, REST APIs, MySQL, JWT
- Web Development Bootcamp – HTML, CSS, JavaScript, Responsive Design
